

PROFESSIONAL SUMMARY

Full-Stack Mobile & Backend Developer with 3+ years of experience engineering high-performance cross-platform mobile applications (React Native, TypeScript) and robust backend microservices (Node.js, Express.js, MongoDB). Proven record across 30+ production deliveries including government transit systems, multi-role advisory platforms, and enterprise networking networks. Specialized in secure REST API design, payment gateways (Razorpay, Phi Commerce, CCAvenue), Aadhaar KYC verification, and full App Store / Play Store release cycles.

TECHNICAL SKILLS

Backend & DB:	Node.js, Express.js, MongoDB, Mongoose ODM, RESTful API Design, JWT Authentication, RBAC, Webhooks, Joi/Zod
Mobile Engineering:	React Native, TypeScript, Android Studio, Xcode, Kotlin, Native Modules, Offline Sync, ProGuard Security
Frontend & Web:	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Architecture, Three.js & WebGL
Cloud, Tools & Deploy:	Google Play Console, Apple App Store Connect, Firebase (FCM & Analytics), Postman, Swagger, Git, GitHub, GitLab
Methodologies:	Agile, Scrum, Sprint Planning, Microservices Architecture, Code Reviews, Secure Software Development

WORK EXPERIENCE

Associate Developer — Mobile & Backend Systems | Techreale

2023 — Present

Onsite • Ahmedabad, India

- Backend Architecture & RESTful APIs:** Architected, built, and optimized high-throughput REST APIs using **Node.js** and **Express.js**; modeled scalable **MongoDB** schemas with **Mongoose ODM**, JWT sessions, and role-based access control.
- SeniorSage ("Start Again") Platform:** Engineered backend microservices for Helper/Expert onboarding, conversational chat registration, real-time **Aadhaar KYC** verification, and **Razorpay** payment gateway reconciliation.
- Cross-Platform Mobile Engineering:** Built full-featured iOS and Android apps with **React Native** and **TypeScript**, achieving consistent 60fps animations, robust offline caching, and native bridge configurations.
- Payment Gateways & Integrations:** Implemented end-to-end payment processing across **Razorpay**, **Phi Commerce**, and **CCAvenue** with checksum verification, webhook reconciliation, and automated invoicing.
- Security Hardening & Store Deployment:** Managed complete release pipelines for Google Play Store and Apple App Store; enforced screen recording/screenshot prevention and ProGuard code obfuscation for enterprise and municipal security standards.
- Cloud Messaging & Telemetry:** Integrated **Firebase Cloud Messaging (FCM)** for personalized push alerts, crash analytics, and telemetry.

KEY PRODUCTION PROJECTS

Start Again (SeniorSage) — Multi-Role Backend API Engine

Node.js • Express.js • MongoDB • Razorpay • Aadhaar KYC

- Designed full backend platform facilitating multi-role interactions between Helpers and Experts with secure JWT/OTP authentication.
- Integrated real-time government **Aadhaar OTP KYC** verification and document validation pipeline for certified expert registration.
- Developed state-driven conversational chat onboarding API dynamically serving question sequences and validating multi-step answers.
- Implemented **Razorpay Payment Gateway** handling registration fees, expert consultation bookings, coupons, and webhook callbacks.
- Engineered real-time push notification pipelines (FCM) with unread counters, coupled with user rating & review aggregation.

i-Pass: AMTS & BRTS Digital Transit Pass System (Govt. Project)

React Native • TypeScript • Node.js APIs • Phi Commerce • CCAvenue

- Official transit app built for **Ahmedabad Municipal Corporation (AMC)**, enabling online and offline bus pass issuance for thousands of commuters.
- Integrated dual payment gateways (Phi Commerce & CCAvenue) with automated transaction callbacks and server validation.
- Hardened device security with screenshot blocking, screen recording prevention, and ProGuard obfuscation; built companion vigilance officer validation app.

HiqLyinks — Professional Networking & Community Platform

React Native • Node.js • Express.js • MongoDB • Realtime Chat

- Engineered enterprise social networking platform connecting organizations and college students with threads, polls, events, and mentorship tracking.

EDUCATION

Master of Computer Applications (MCA) — Gujarat Technological University (GTU) (CGPA: 8.10 / 10)

2021 — 2023
